# Requirement Analysis

## Solution Requirements (Functional & Non-functional)

| | |
|---|---|
| Date | 5 September 2026 |
| Student Name | Mamidi Jaya Vardhan |
| Project Name | Automated Network Request Management |
| Maximum Marks | |

## Functional Requirements

| FR No. | Functional Requirement | Sub Requirement |
|---|---|---|
| FR-1 | Application Setup | Create Network Request Management scoped application and required tables. |
| FR-2 | Request Capture | Capture Requester, Request Type, Location, Description and Business Justification. |
| FR-3 | Request Types | Support New Connection, Bandwidth Upgrade, IP Allocation and VPN Access requests. |
| FR-4 | Validation | Validate mandatory fields and request information before submission. |
| FR-5 | Approvals | Configure approval workflow based on request type and requirements. |
| FR-6 | Assignment | Automatically assign approved requests to the Network Team. |
| FR-7 | Fulfillment | Create and track fulfillment tasks until request completion. |
| FR-8 | Notifications | Send notifications for submission, approval, assignment and closure. |
| FR-9 | Portal | Provide a ServiceNow portal for submitting and tracking requests. |
| FR-10 | Reporting | Provide reports and dashboards for request monitoring and analysis. |

## Non-functional Requirements

| NFR No. | Requirement | Description |
|---|---|---|
| NFR-1 | Usability | Provide a simple and user-friendly interface for submitting network requests. |
| NFR-2 | Security | Use ServiceNow role-based access and scoped application security controls. |
| NFR-3 | Reliability | Ensure workflows, approvals and validations work consistently. |
| NFR-4 | Performance | Provide responsive request submission and processing. |
| NFR-5 | Availability | Application availability depends on the ServiceNow instance. |
| NFR-6 | Scalability | Support future request types, automation and additional network teams. |
| NFR-7 | Maintainability | Allow administrators to easily update workflows, rules and configurations. |
| NFR-8 | Data Integrity | Ensure accurate request data and proper status tracking throughout the lifecycle. |

# Solution Requirements — Functional Coverage

| | | |
|---|---|---|
| **FR-1** | **Application setup** | Network Request Management scoped application with required tables and modules. |
| **FR-2** | **Request capture** | Capture requester, request type, location, description, business justification, and required start/end date. |
| **FR-3** | **Request types** | Support different request types: New Connection, Bandwidth Upgrade, IP Allocation, VPN Access, Others. |
| **FR-4** | **Validation** | Mandatory fields validation, date validation, and attachment validation. |
| **FR-5** | **Approvals** | Multi-level approval workflow based on request type and location. |
| **FR-6** | **Assignment** | Auto-assign approved requests to network team based on location and type. |
| **FR-7** | **Fulfillment** | Track fulfillment tasks, update status, and add work notes. |
| **FR-8** | **Notifications** | Email notifications for request submission, approval, assignment and closure. |
| **FR-9** | **Portal experience** | Network Request catalog item, request form, and request status tracking in portal. |
| **FR-10** | **Reporting & dashboard** | Provide dashboards and reports for volume, status, aging and SLA compliance. |
