Empathy Map Canvas

Dimension	Employee / End User Perspective
Says	I need a simple and quick way to request network services.
Thinks	I want only relevant options and a guided request form.
Does	Opens the Service Portal, selects the Network Request catalog item, fills in the details, and submits the request.
Feels	Wants a fast, reliable, and transparent network service experience.
Pain Points	Incomplete request information, unclear forms, delayed processing, and limited request-status visibility.
Needs / Goals	Guided request submission, complete information capture, automated approvals and task fulfillment, timely notifications, and status tracking.

Automated Network Request- Empathy Map
